

MILLBRAE

DEVELOPMENT The station opened in June 2003. A Specific Plan was adopted and environmentally cleared by City. There is significant private sector interest in BART property at the station. BART has initiated discussions with SamTrans (per Comprehensive Agreement) to address joint development opportunity and devise a course of action.

ACCESS IMPROVEMENTS This station offers direct access to Caltrain and SFO, and after eight months of operation in 2003, was subject to some service and schedule changes in February 2004. The District has prepared a cost estimate for a project to install "Talking Signs" at the Millbrae Station. Funding has not yet been identified. Daily parking charges, which apply to all parking spaces at the Millbrae Station, were reduced to stimulate ridership in January 2004, and parking time limits were relaxed to allow longer-than-24-hour weekend use of the garage. A monthly reserved parking program is available as an additional parking option.
